

Please reject NAB's petition 04-160.
Satellite radio should be allowed to compete with over the air broadcast radio and provide local information. What is wrong with new technology competing with the old 1930's technology? Should people not be allowed to listen to CD's or tapes?

Do the right thing and promote the new technology of satellite TV and radio. Do not let the NAB get away with it's attempts to squelch competition.
